The Self-Reliant Woman

The busy world in its headlong impetu sity has little space for the woman worker, but better, far better, for it, is the gentle and restraining influence of her presence, and for her an independent career during a part of her life broadens her views and deepens her sympathies,

The ambitious girl, by following her bent, is not unfitted for the duties of woman's peculiar province, but as wife becomes the intelligent companion of her husband, instead of the toy of his hours of idleness, and as mother is better qualified for the office of guide and coun-slightly waved and drawn towards the selor.

It is now believed that during the next ten years storms and rainfalls will be foretold throughout the world with accuracy. A high thermometer goes before wind and rain storms, and a low thermometer follows winds and rain storms, and they are not over until the weather turns cooler. They usually originate in the west and travel east, making the Mississiphy valley table one. originate in the west and travel east, making the Mississippi valley their center. The next strong tendency to rainfail is about the 24th to 26th of this month. It is the equinox of Vulcan on the 24th, assisted by the equinox of Mercury upon the 21st. Mercury has not much strength without being assisted by Vulcan. The next thereafter will be June 4 and 11, both equinoxes of Vulcan, assisted by a semi-equinox of Earth, known as the June equinox. It is not possible to conjecture what will be the rainfail in Texas at these dates, since we are not the center, eniarging her capacity for enjoyment and opening for her wider fields of usefulmess.

The ambilious girl, by following her capacity for enjoyment and of the head or the Mikado bow-knot, a graceful knot made with three long loops of hair with curied ends, fastened with rain storms will advance, as it has knowledge already gained in regard to rain storms will advance, as it has with steam and electricity. It is true that the man who said telegraphy was a humbug, and bet that the first dispatch sent over the wires from St. Louis to Cincipatit could not be read in Constant. cinnati could not be read in Cincinnati, won his bet. Weather scientists now say that the crops in low lands will be drowned out in June, 1889. Jupiter will do this, and just here we take the risk of making ourselves liable to criticism by suggesting that in droughts at Fort Worth, when there is a low barometer passing, that we arrest it, or attempt to, by gunpowder explosions, cannon, or one or two hundred rounds of anvil explo It is an experiment, and we might fail, but the newspaper editors in the Marriage does not come to all women, and coming to some, is the man always the husband in the true sense of the old Saxon word?
